Comprehensive Surveillance Solution

Challenges During Operation

Security: When there is theft happening in the vehicle, it is hard to recognize the behavior and face through the recording.

**Evidence management:** It is difficult to manage video evidence.

Maintenance: Most problems are not found until the device gets wrong. Even the maintenace staff comes, he only solves parts of the problem.

GDS: It is difficult to monitor bad driving behavior, such as curving, gliding, revving, idling etc...

Event search: It is inconvenient and complicated to search over speed recording evidence according to report.

Reliability: It is hard to make recording stable after sudden power-off.

Black® Boxer

Software Ceiba II–Four In One
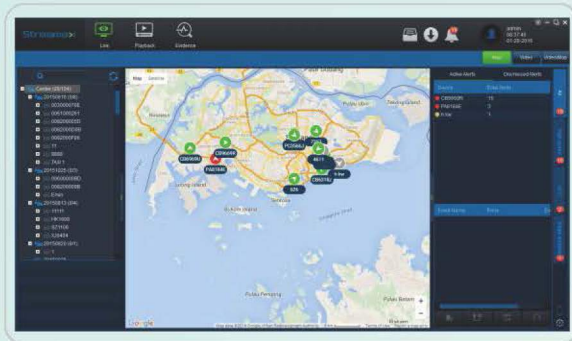

- Real-time video
- Real-time Location
- Real-time metadata

- Auto evidence export
- Evidence search
- Easy to manage evidence

FOUR IN ONE

01 Option A — **Live View**

04 Option D — **Evidence**

02 Option B — **Playback**

03 Option C — **ADS**

- Video and location playback
- Metadata playback
- Video clip

- Auto download by different categories
- AP management balance technology
- Auto adaptive network technology
